2 Segment information

(a) Description of segments

Management has determined the operating segments based on the reports reviewed by the Board that are used to make strategic decisions.

The Board considers the business from both a product and geographic perspective and has identified nine operating segments of which four (2016, two) are reportable in accordance with the requirements of AASB 8.

The Corporate Services segment consists of managerial and legal services provided to the group in addition to strategic investment holdings.

The Minerals segment consists of engineering and related services provided to the extractive mining industry. The clients, including junior exploration companies and major multinational producers, are developing projects for a wide range of commodities. These projects range in scope from large greenfield projects involving process plant and equipment, civil, building works, control systems, services and infrastructure to small skid-mounted pilot plants.

The Process Industries segment consists of engineering and related services provided to the manufacturing and renewable energy facilities throughout Australia and South East Asia.

The Project Services - Africa segment consists of project management, construction management and commissioning services provided to the extractive mining industry in Africa.

All other operating segments are not reportable operating segments, as they fall under the quantitative thresholds of AASB 8. The results of these operations are included in the 'Other' column.

2 Segment information (continued)

(a) Description of segments (continued)

The remaining operating segments that are not reportable consists of:

Infrastructure:	engineering and related services including architectural designs, power supply and distribution, water supply and distribution, accommodation, buildings, roads and other general civil and infrastructure components.
Asset Management	reliability and engineering maintenance services to clients in the petrochemical, oil and gas, mining minerals, marine and manufacturing sectors.
Rait	project development phase studies, engineering and design, procurement and construction phase services for rail infrastructure projects across Australia.
Metallurgical:	metallurgical consulting providing a range of services to the mineral processing community, primarily in the field of comminution, hydrometallurgy and mineral processing design.

Project Services Asia: provision of drafting services for offshore Lycopodium entities.

At 1 July 2016, the operating segments of Infrastructure, Asset Management and Rail were amalgamated in order to achieve better economies of scale and efficiencies. In both financial years ended 30 June 2017 and 30 June 2016, these stand-alone operating segments and amalgamated segments were not reportable segments.
